Supplementary Figure S2 - Evolutionary trajectories including both short and long-term periods, for all sets of populations and traits studied.

Figure S2 - Evolutionary trajectories including both short and long-term periods, for all sets of populations and traits studied. A1R - Age of first reproduction (number of days), F17 - Early fecundity (number of eggs), F812 - Peak fecundity (number of eggs), RM - Male starvation resistance (in hours), RF - Female starvation resistance (in hours). Dashed lines indicate short term period and full line indicates long-term period. Shaded area represent 95% confidence intervals estimated from the regression, using mean replicate values.
